# Desert Southwest Photo Expedition

## Capture Iconic Vistas & Sublime Light in America's Canyon Country

The striking desert landscapes of the American Southwest have long captivated photographers seeking to arrest its drama in images. Standing on the edge of the Grand Canyon's mile-high rim, ponder layers of color and shadow in a chasm carved over millennia. Marvel at the pink spires of Bryce Canyon's sandstone hoodoos. Gape at plumes of water pouring off the vertical cliffs at Zion. These classic vistas offer thrilling opportunities for nature photographers. Capture these coveted scenes and more, including dramatic aerial shots over Zion Canyon from a helicopter. With our expert photographer guides, find exciting subjects and unexpected surprises in lesser-known corners of all three renowned national parks. Whether you're a seasoned pro or a novice photographer with a passion for dramatic landscapes, these mighty monuments promise inspiring encounters and a trove of images you'll be proud of.

## Trip Highlights

**Just 10% of visitors get to the Grand Canyon's more remote North Rim—promising exhilarating images of the world's most famous chasm, away from crowds**

**Witness the geological drama of Zion National Park, Smith Mesa and Kolob Canyons as you get thrilling aerial shots on a private helicopter flight**

**Desert photography can be tricky, with the sun's glare and deep contrasts in shadowy canyons—our guides are pros in helping you navigate challenging light**

## Desert Southwest Photo Expedition Itinerary

Capture Iconic Vistas & Sublime Light in America's Canyon Country

### Day 1: St. George, Utah

Few landscapes are as frequently photographed as the American Southwest canyonlands, a complex realm of foreground elements featuring intricate layers and shapes that seem to shift depending on the dramatic light. Here, ravines and rivers lead the eye through the vast expanse, while shadows evolve depending on the sun's location in the sky.

Our canyonlands adventure begins in the red rock country of St. George, Utah, which offers an abundance of red sandstone cliffs and formations, and slot canyons. This evening, meet for a welcome dinner at a local restaurant with our Photo Expedition Leader. Chosen for expertise in both photography and natural history knowledge, our guide offers an overview of our journey ahead, including a primer on shooting images in this arid realm known for its challenging light conditions. Learn about the history, geology, wildlife and ecology of the Colorado Plateau, which we explore in depth in the days to come on our foray through three of the world's most magnificent national parks.

### Itinerary At A Glance

#### Day 8

Grand Canyon / St. George /  
Depart

### Day 2: Cedar Breaks National Park / Bryce Canyon National Park— Astrophotography

Today's focus is landscape photography, and your Photo Expedition Leader will explain the art of capturing the rich red, yellow, orange and ochre hues of the surrounding terrain as we drive the exhilarating route to Bryce Canyon. Along the way, we stop at several scenic spots, including Cedar Breaks National Monument and its yawning canyon, visible from the rim at 10,350 feet. To capture the half-mile-deep geological amphitheater of stacked orange layers, fins and pinnacles, we'll focus on composition, framing and exposure as we optimize the natural light. Dynamic natural forces over millennia have exposed and sculpted this terraced terrain topped with ancient bristlecone pines and subalpine forest. Cedar Breaks crowns the Grand Staircase, which our itinerary follows throughout the trip as we descend this series of five sedimentary "steps" into ever older geological features, each characterized by a different color and biome over a time span of more than 200 million years.

Later this afternoon we reach Bryce Canyon, established in 1925. This fantastical landscape feels like a portal to another world as we shoot its pink pinnacles, limestone formations and natural amphitheaters, experimenting with silhouette and panoramic photography. Red rock walls are rent with deep channels while whimsical hoodoos—rock spires carved eons ago by erosion—rise hundreds of feet into the sky.

After dark, we'll have our first astrophotography session under Bryce's night skies, some of the darkest in the U.S. thanks to the park's high elevation above 8,000 feet, its remote location, and its clear, clean air. Joined by a park ranger who specializes in interpreting the night sky, we head just outside the park boundary, away from any artificial light, to capture the astral display. Concentrating on wide angle and long exposure shots to capture the ethereal wonder of the stars overhead. Offering an extraordinary view of the cosmos, Bryce holds International Dark Sky status, and the absence of light pollution reveals more than 7,500 stars on a clear night, while the Milky Way arcs overhead. When there is a new moon, the sight is otherworldly, as planets, constellations and distant galaxies are visible. Hone your astrophotography skills tonight in anticipation of additional sessions in Zion and Grand Canyon.

## Discovering Our Planet Together

### Day 3: Photographing Bryce Canyon National Park

Capture the morning's golden-hour light as we set out early on foot. As the sun climbs into the sky, the light of sunrise fills the Bryce Amphitheater, the park's most iconic site, and the greatest concentration of irregular rock spires (called "hoodoos") found anywhere on Earth. Our Photo Expedition Leader advises on filters and hoods to reduce flare spots and lines. We'll play with light and detail, zooming in and out to create images that document how different this ancient landscape can appear, depending on the conditions. Then, we continue our photography walk, descending roughly 550 feet into the lower canyon. Pinyon pines and junipers punctuate the landscape, offering a green contrast to the looming pink sandstone forest of hoodoos. Here, nature's power is writ large, and our images offer an opportunity to reflect on how small one can feel when immersed in its grandeur. (Guests who don't wish to tackle the elevation gain can walk the paved trails on the rim.) In the afternoon, more opportunities await to photograph Bryce from different locations, including a panorama across the vast landscape of the natural amphitheater crowded with hoodoos.

### Day 4: Bryce Canyon Sunrise / Zion National Park

We rise at dawn and head to the Bryce Canyon rim nearby to shoot in the ethereal light of sunrise. Our Photo Expedition Leader explains the advantages of starburst shots as we photograph a striking array of colors while the changing light illuminates the stone pinnacles and sheer cliffs. A morning hike offers yet more angles on this wondrous landscape, more evocative with each turn in the trail.

Then it's time to head for Zion National Park on one of the most scenic drives in the American Southwest. Keep an eye out for bighorn sheep to photograph as we follow the narrow two-lane road that cuts through canyons and twists below towering monoliths. As we approach Zion, we pass Checkerboard Mesa, a 6,250-foot landmark of striated Navajo Sandstone. Early Mormon pioneers gave Zion its name—so striking was its beauty that it evoked images of the biblical Promised Land. The U.S. government agreed and made it a national park in 1919. Multi-hued sandstone ramparts rise above the valley floor where the Virgin River flows among the cottonwoods, carving a deep canyon over millennia and blending lush greenery with dramatic rocks.

### Day 5: Hiking in Zion National Park / Scenic Helicopter Flight

Begin the day photographing Zion Canyon on foot, following narrow trails below 2,000-foot cliffs of Navajo Sandstone. Our Photo Expedition Leader will discuss aperture and its importance when you're shooting different subjects in the same place, such as Zion's prolific birdlife and its dramatic geological features. The Virgin River carved this canyon millions of years ago, and using slow shutter speeds, we capture its turquoise path and the life it sustains, like tiny wildflowers, mule deer and rock squirrels. Trails along the river lead to quiet recesses, where we may hear and see many birds unique to the American West: canyon wrens, golden eagles, prairie falcons, American dippers and phoebes, among others. Then climb higher for striking shots of the towering canyon walls and shadowy depths below. Throughout the day, we task ourselves to capture Zion's sheer size, using the canyon's massive stone ramparts for perspective and focus.

And for even more perspective, enjoy a scenic helicopter flight in and around Zion National Park, offering aerial views of Smith Mesa, Kolob Canyon and Red Butte Mountain, in addition to notable landmarks of the park itself. Note that photo opportunities are limited during the flight, however.

### Day 6: Morning Hike in Zion / Grand Canyon National Park—North Rim

Following a peaceful morning hike in Zion, we travel south to the Grand Canyon, established in 1919. Lying entirely within the state of Arizona, the park encompasses 278 miles of the Colorado River and adjacent plateau. Located on the ancestral homelands of 11 tribal communities that hold the space sacred, Grand Canyon is one of the most spectacular examples of erosion anywhere on Earth. We'll use the canyon's natural layers as leading lines as we focus today on landscape composition.

Grand Canyon's popularity can mean many visitors, so we avoid the bulk of the crowds by concentrating on the less visited but no less spectacular North Rim. With only 10% of the total number of visitors to the national park each year, this area proffers more secluded and uninterrupted photo opportunities. We spend two nights at Grand Canyon Lodge, tucked among the ponderosa pines at 8,000 feet on the canyon's edge. The classic lodge, now a National Historic Landmark, is the only accommodation inside the park on the North Rim. Built in 1928 by architect Gilbert Stanley Underwood, the lodge on Bright Angel Point was constructed of native Kaibab limestone and heavy timber logs that capture the rustic national park style of the era. After a fire four years later, it was rebuilt in 1936, preserving the original stone, and that venerable structure endures today.

Our time at the Grand Canyon will be devoted to making pictures that tell the story of this special place. Humans have lived in the Grand Canyon region for 25,000 years, a mere blip in time compared to the 1.7-billion-year-old Vishnu Schist rocks visible along the Colorado River in the bottom of the canyon. Our relatively open schedule allows plenty of time to frame and shoot the drama of one of the planet's most magnificent natural landscapes. It may be helpful to think of today as reconnaissance, practicing certain shots in preparation for tomorrow. We conclude the day with a sunset shoot.

## Discovering Our Planet Together

### Day 7: Grand Canyon Sunrise / Hiking the North Rim

Today is the culmination of all we have practiced—working with light (and its absence), natural leading lines, composition, exposure and detail. It's also an opportunity to gaze into the mile-deep chasm of the Grand Canyon in the ethereal light of sunrise and sunset to capture the fleeting beauty in images. Our Photo Expedition Leader knows the best overlooks to capture the beauty of sunrise, including Cape Royal and Point Imperial, though really, any spot on the rim is going to offer a stunning experience. Sunset will likewise bring astonishment as we watch the canyon depths shift from orange and rust to pink and purple as the sinking sun casts its glow in contrast to with the shadows moving across the etched peaks and crevasses.

We spend the day on several hikes, tapping the deep knowledge of our Photo Expedition Leader who knows the best trails and viewpoints for a more secluded encounter with this extraordinary geological phenomenon. Capture vistas from different viewpoints along the rim and just below, enjoying moments of relative solitude. Tonight, we share a farewell dinner at the lodge. Then, step out onto the stone terrace for your last opportunity to capture the sunset and to shoot the Grand Canyon's celestial wonders. The park was recognized as an International Dark Sky Park in 2019, after a three-year endeavor to protect its night skies by altering light fixtures and taking measures to reduce light pollution.

### Day 8: Grand Canyon / St. George / Depart

Rise at dawn for your final chance to capture the sunrise over the North Rim before we depart after breakfast. Although you're leaving this inspirational landscape, the anticipation of reviewing, editing and sharing your images builds. Soon you'll be sharing the stories of America's canyon country. For now, we travel back to St. George, arriving in time for afternoon flights home (book no earlier than 12:30 pm).

***Please note:*** *This itinerary is subject to change, as departures may visit Grand Canyon, Zion and Bryce in a different order than what is outlined above. Your precise itinerary will be communicated to you once your trip dates are confirmed.*

## Desert Southwest Photo Expedition Accommodations

Capture Iconic Vistas & Sublime Light in America's Canyon Country

#### Bryce Canyon Lodge

This venerable 1920s lodge stands alone inside the national park, offering rustic cabins, contemporary hotel rooms and unrivaled access to trails, stunning views and the Bryce Amphitheater.

#### Bryce Canyon Grand Hotel

The newest lodging in the Bryce Canyon area, this highly acclaimed full-service hotel offers deluxe accommodations in spacious 350-square-foot guest rooms

#### Ruby's Inn

Opened to Bryce Canyon visitors as "Tourist Rest" in 1919, the original historic lodge was rebuilt after a 1984 fire yet retains the same family-run hospitality with a fourth generation at the helm.

## Discovering Our Planet Together

### Zion Lodge

The only accommodation located inside the national park, Zion Lodge offers coveted proximity and classic 1920s atmosphere, backdropped by the canyon's massive sandstone ramparts.

### SpringHill Suites Zion

Just a mile from the entrance to Zion National Park, this stylish jumping-off point for exploring Utah's canyonlands offers spacious modern suites filled with natural light and red rock views for breakfast.

### Grand Canyon Lodge

The North Rim's only lodging inside the national park, this historic 1928 lodge on Bright Angel Point was built in harmony with nature using native Kaibab limestone and ponderosa pine timbers.

### Hyatt Place St. George

The premier place to stay in St. George, Hyatt Place offers a central location, grand views of the red rock surroundings, and large, light-filled rooms in earthy desert tones.

## No Better Context for Canyon Photography

While most people are familiar with the sweeping panoramas and fantastic formations of Bryce, Zion and the Grand Canyon, few manage to obtain outstanding photos of these iconic national treasures. Relegated to bus tours and heavily traveled trails, or going it on their own with little local intel, most visitors miss the best context in which to photograph these magnificent monuments. Our expert guides get you off the standard track to find rare compositions in these classic national parks, revealing lesser-known locations and dramatic perspectives. *Here's why our approach stands out:*

---

### 1 Capture All the Wonder Without All the Planning

Zion, Bryce, and Grand Canyon are among America's most popular national parks, with accommodations filling months in advance and crowds competing for the perfect shot at every viewpoint. When you travel with Nat Hab, you'll worry about none of those concerns: We arrange the most desirable lodging, navigate park roads, provide exceptional interpretation, and reveal hidden photo spots and subjects others miss.

### 2 Small Groups Led by Two Photo Expedition Leaders

Our group is capped at just 10 photographers—and we divide you between two vehicles, ensuring plenty of room for all your equipment and the ability to reach prime photography spots that larger tour buses can't access. In a small group, we enjoy the utmost in flexibility, comfort and personal interaction with two Nat Hab Photo Expedition Leaders—you won't find a better guide-to-guest ratio!

### 3 Our Expedition Leaders are Both Naturalists and Professional Photographers

Our expert guides know Canyon Country like none other, intimately versed in its millennia of natural history, ecology, wildlife and cultural heritage. And they possess equally impressive photography expertise, able to offer photographers of all ability levels a host of tips, tricks and tactics for capturing superlative images in light conditions that can be both tricky and pure magic. You'll get all the personalized coaching you want in our small-group context.

### 4 Chase the Best Light for Photography

Our small group is nimble enough to move when the light is best, and to move on when it isn't. We rise early to catch the first rays of dawn reflected off the rock formations, bathing them in a vermilion glow. As the sun climbs, it reveals a shifting palette that transforms the natural bridges, cliffs and canyon walls. And we'll linger at sunset, watching the colors glow, deepen and fade.

## Discovering Our Planet Together

### 5 Get Aerial Shots by Private Helicopter over Bryce Canyon

Take to the skies on an exhilarating 30-minute helicopter flight over the "forests" of pink sandstone hoodoos Bryce Canyon is renowned for. Our aircraft is able to fly low and slow, allowing you to get exciting angles on famous formations and the broader canyon landscape.

### 6 Nat Hab's Exclusive North America Safari Cruisers Enhance Photography

Our are customized luxury vans that are exceptionally comfortable and equipped with either a pop-top roof or wide roof hatches that open for unimpeded photography. Designed for exploring America's national parks, they offer the best of both necessities: an expedition-ready exterior and a spacious, luxurious interior for the ultimate in comfort. We never fill them to capacity, so every guest gets a window seat plus plenty of room for your gear.

### 7 Focus on the Grand Canyon's Quieter North Rim

Ninety percent of visitors to the Grand Canyon concentrate on the South Rim, which is far more touristed and heavily paved than its counterpart across the chasm. More remote and less accessible, the North Rim evokes an experience of the Grand Canyon as it was decades ago, when the predominant sound was wind in the pines and you could wander trails on the rim in relative solitude. This quiet atmosphere provides ample opportunities for shooting fantastic, unobstructed photos.

### 8 Enjoy Stays at Coveted Accommodations

Grand Canyon Lodge on the North Rim is a quintessential part of U.S. national park heritage, and staying here enhances your experience with its ambience and proximity for big views right outside the door. We likewise use other in-demand accommodations in key locations, ensuring you're close to nature, not towns and strip malls. Plus, you won't have to struggle for almost-impossible-to-get reservations: we've already secured them. (While all departures include Grand Canyon Lodge, other hotels may vary based on your departure date; please inquire for details.)

### 9 With Decades of Experience, Your Guide Knows Every Trail

Our expert guides' depth in the American Southwest is second to none. They know where the best "paths less traveled" are located, for wildlife watching and breathtaking landscape shots. They know how to avoid the biggest swarms of tourists. With lots of special stops and surprises up their sleeves, our Expedition Leaders share a side of Canyon Country with you that most visitors never see. See **Expedition Leader bios** with traveler comments regarding the quality of our leaders.

### 10 Our Quality-Value Guarantee Ensures Your Exceptional Canyons Photography Experience

With Natural Habitat Adventures, you receive our exclusive guarantee that clearly states that we will meet the high expectations we set forth in our promotional materials. To our knowledge, this is the most ambitious guarantee made by any adventure travel company.

## Discovering Our Planet Together

### **11** Feel Good About Your Carbon-Neutral Journey

We care deeply about our planet, as we know you do. When you travel with us, the carbon emissions from your trip are 100% offset—including your round-trip flights from home. Natural Habitat Adventures has been the world's first carbon-neutral travel company since 2007.

### **12** Natural Habitat Adventures Is World Wildlife Fund's Travel Partner

Because of our commitment to environmentally friendly travel, as well as the exceptional quality of our small-group nature adventures, World Wildlife Fund, the world's leading environmental conservation organization, has named Natural Habitat Adventures its worldwide travel partner — a designation that makes us exceedingly proud!

## 2025 Departures

Departure	Return	Notes
Sep 28, 2025	Oct 5, 2025	\$7895 USD <b>Habitat Club Pricing Available</b>

## Pricing

See <https://nathab.com/us-national-parks-tours/grand-canyon-bryce-zion-photo-expedition/dates-fees> for the latest pricing details.

## Included

Accommodations, services of Nat Hab's professional Expedition Leader(s) and local staff, scenic helicopter ride over Bryce Canyon, van transportation, all meals from dinner on Day 1 through breakfast on final day, some gratuities, airport transfers on Day 1 and final day, all activities and entrance fees, all taxes, permits and service fees.

## Not Included

Travel to and from the start and end point of your trip, alcoholic beverages, some gratuities, passport and visa fees (if any), optional activities, items of a personal nature (phone calls, laundry and internet, etc.), airline baggage fees, airport and departure taxes (if any), optional travel protection and medical evacuation insurance.

## Important Information About This Trip

This trip offers our guests a chance to encounter a side of the American Southwest that most casual tourists miss. The main goal of our seasoned Expedition Leaders is to get our travelers to less-visited areas away from heavy crowds in order to experience the wildlife and natural grandeur of the canyonlands in the most secluded manner possible. Specific dates cannot be booked with the national parks until August (for the following year). Trip dates listed are likely to change slightly and will be confirmed at that time. Depending upon availability, itineraries may run in a different order.

## Getting There & Getting Home

We recommend that you arrive to St. George, Utah, by 5 pm on Day 1 in order to join your group orientation at 5:30pm. If you are departing out of St. George, Utah, you are free to depart after 12:30 pm on the final day and will be transferred to the airport. If you are traveling to Las Vegas via shuttle, you are free to depart on the shuttle any time after 12 pm and will be transferred to the shuttle station. We recommend booking flights out of Las Vegas for 3 pm or later, depending on your shuttle departure time.
